

Figure 1 consists of 12 histograms arranged in a 6x2 grid. The columns are labeled 'n=10' and 'n=20'. The rows are labeled 'k=1', 'k=2', 'k=3', 'k=4', 'k=5', and 'k=6'. The x-axis for all histograms is 'Number of non-zero elements' ranging from 0 to 100. The y-axis is 'Frequency' ranging from 0 to 10. The distributions are generally bell-shaped and centered around 50 for n=10 and 100 for n=20. The frequency decreases as k increases.
